1 WIRING TO REMOTE BOX

The feeds coming out of each stem will be labeled to match the drivers inside the enclosure, close driver box once wiring is done.

2 MOUNTING FIXTURE

Screw the provided 1/4-18 stem into the WAVE fixture, do this step for all four stems.

3

Next insert custom cover through stem, and secure 1/4-18 nut to stem. Apply loctite for safety purposes. Then proceed to insert the custom J-bar.

4

Once the J-bar is through the J-bar, secure 1/4-18 nuts to stem.

note: each power feed stem will be labeled to match its driver.

5

With the help of two or more people, bring the fixture up.

6

Connect the positive and negative wires from the driver box to the labeled wires coming out of the stem.

7

Screw custom J-Bar onto the 4x4 square junction box.

note: two or more people must be holding the fixture while working.

8

Raise square canopies up to the J-bar, canopies will be held by magnets located in the J-bar.

9

Lastly, turn on fixture.
