

PF2 perimeter fill

Our Perimeter fill luminaires regress into ceilings at the edges of spaces, providing uniform ambient light. Custom lengths and patterns are tailored to suit any modern space.

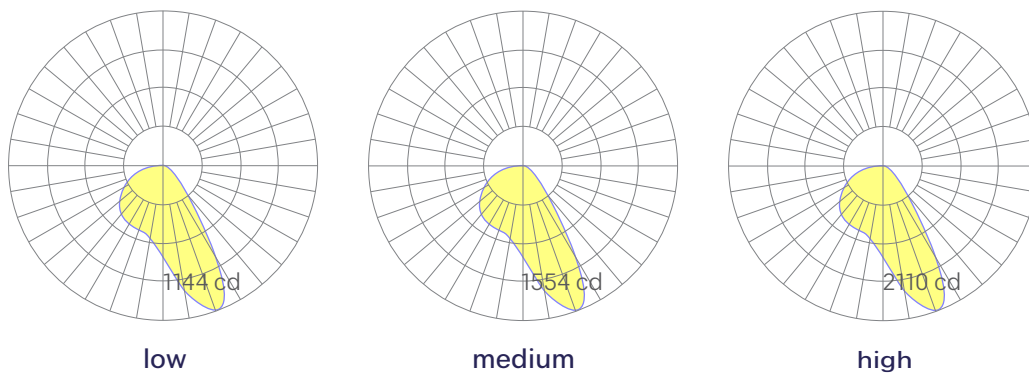

Features

- Discreet ambient lighting from room perimeter
- Extruded, recycled, premium aluminum housing
- Aluminum core LED boards, specifiable optics
- Specifiable color temperature. CRI > 90, R9 >50
- Custom lengths and finishes available
- Specifiable dimmable drivers or PoE
- 5 Year, 50,000 hour warranty, damp location rated
- WELL Building Standard compatible [learn more](#)

Output ¹	Watts/ft	Lumens/ft
Low	5	431
Medium	7	586
High	10	795

¹Based on a typically configured 90 CRI, 3500K luminaire using one driver. Custom outputs available. Please consult factory.
For 4000K multiply by 1.02, for 3000K 0.98, for 2700K 0.96; these multipliers also apply to Tunable White.
For Tunable White outputs, multiply by 1.05 for 5000K and by 1.1 for 6500K.

Drivers & Electrical

Integral drivers* with 0-10V Dimming standard. Several other driver options available; see ordering information.

*DMX drivers are provided in remote enclosures.

Sensors & Controls

Sensors are installed on an aluminum plate adjacent to the luminaire lens¹. Coronet remains agnostic in our approach to sensors and control systems; our fixtures are compatible with most systems offered.

¹Not applicable to indirect only models. Consult factory.

Emergency Back-Up

For fixtures three-feet or longer, a 4W integral emergency driver may be wired to 4ft sections. 7W, 10W, and 12W drivers are also available (not all integral; consult factory). Emergency circuits for use with building generators are also available.

PoE (Power over Ethernet)

Compatible with virtually all PoE systems including Molex Coresync, Igor, Smartengine, Platformatics, and NuLED SPICEbox. Consult Factory for systems not listed, See [here](#) for more info.

Finishes

All luminaires are finished in high quality polyester powder coating. Our standard color is white. Any RAL color may be specified.

Weight

5 lbs per foot

Patterns

Featuring illuminated welded corners and angles. Consult factory for custom designs.

Optics

Extruded satin acrylic lenses provide excellent diffusion, high transmission, and no LED imaging.

Construction

Housings are extruded premium, recycled aluminum. Individual fixtures are available up to 12' long and may be specified as nominal or precision lengths. Precision lengths are supplied within 1/8" tolerance.

Joined Runs

Runs of any length may be specified and are comprised of multiple, factory-engineered, joined sections. Individually specified luminaires are not field joinable.

Representative joinery. For product specific details see installation guides or submittal drawings.

Please consult factory shop drawings for suspension points. To prevent damage to fixtures, factory designated suspension points must not be field altered.

PF2 perimeter fill

Optional field cuttable end (FC)

Field cuttable up to 3" inches for flexibility. See example below.

X = Fixture size ordered by client
X + 3" = Fixture size built and supplied by Coronet

Simple installation instructions below; For complete installation guide see website or consult factory.

PF2 perimeter fill

Optional Wall to wall end cap (WTW)

Optional end cap that ends at the lens and does not go the full drop of the fixture. See difference below compared to the normal end.
