

Slick indirect/direct system

A linear system offering optional modular downlights with three available beam spreads. Custom lengths, patterns, & configurations are tailored to suit any modern space.

Features

- Available with linear lenses , downlights, and blank plates
- Extruded, recycled aluminum housing
- Specifiable color temperature. CRI > 90, R9 >50
- Specifiable dimmable drivers or PoE
- Custom control solutions available
- Custom finishes available
- 5 Year, 50,000 hour warranty, damp location rated
- WELL Building Standard compatible [learn more](#)

Ordering Information

For each option group below specify one option. If you don't see your preferred option listed, contact us for [help](#). Please submit a sketch of luminaire system with location of downlights. See page 3.

¹Based on a typically configured 90 CRI, 3500K luminaire using one driver.

²Based on a flood optic with 90 CRI, 3500K luminaire using one driver.

Custom outputs available. Please consult factory.

For 4000K multiply by 1.02; for 3000K, 0.98; for 2700K, 0.96.

*80 CRI equivalent 104 LPW

Wiring diagrams, PoE and sensor details

Slick indirect/direct system

Sample Sketches

Please submit a sketch that indicates the following:

- Total length of the luminaire
- Location and quantity of downlights

See the below example.

Slick indirect/direct system

Drivers & Electrical

Integral drivers* with 0-10V Dimming standard. Several other driver options available; see ordering information.

*Depending on configuration of system, remote drivers maybe required. Consult factory for more information.

Sensors & Controls

Sensors are installed on an aluminum plate adjacent to the luminaire lens¹. Coronet remains agnostic in our approach to sensors and control systems; our fixtures are compatible with most systems offered.

¹Not applicable to indirect only models. Consult factory.

Emergency Back-Up

For fixtures three-feet or longer, a 4W integral emergency driver may be wired to 4ft sections. 7W, 10W, and 12W drivers are also available (not all integral; consult factory). Emergency circuits for use with building generators are also available.

PoE (Power over Ethernet)

Compatible with virtually all PoE systems including Moxel Coresync, Igor, Smartengine, Platformatics, and NuLED SPICEbox.

Consult factory for systems not listed. See [here](#) for more info.

Finishes

All luminaires are finished in high quality polyester powder coating. Our standard color is white. Any RAL color may be specified.

Weight

3 lbs per foot

Patterns

Featuring illuminated welded corners and angles. Consult factory for custom designs and elevations.

Optics

Extruded satin acrylic lenses provide excellent diffusion, high transmission, and no LED imaging.

Construction

Housings are extruded premium, recycled aluminum. Individual fixtures are available up to 12' long and may be specified as nominal or precision lengths. Precision lengths are supplied within 1/8" tolerance.

Joined Runs

Runs of any length may be specified and are comprised of multiple, factory-engineered, joined sections. Individually specified luminaires are not field joinable.

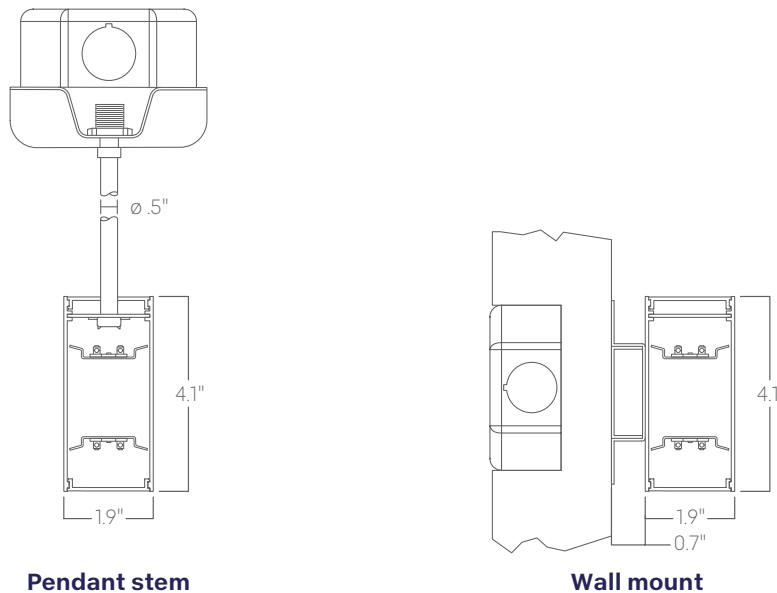

Representative joinery. For product specific details see installation guides or submittal drawings.

Slick indirect/direct system

Mounting Options

Custom mounting types and ceiling transitions available; consult factory.

Please consult factory shop drawings for suspension points.

To prevent damage to fixtures, factory designated suspension points must not be field altered.

Do not attempt installation if you do not understand the installation instructions.
