acoustic series

Coronet[®]
designed and built in the USA

a CarbonNeutral[®] company

Light, Sound and Style

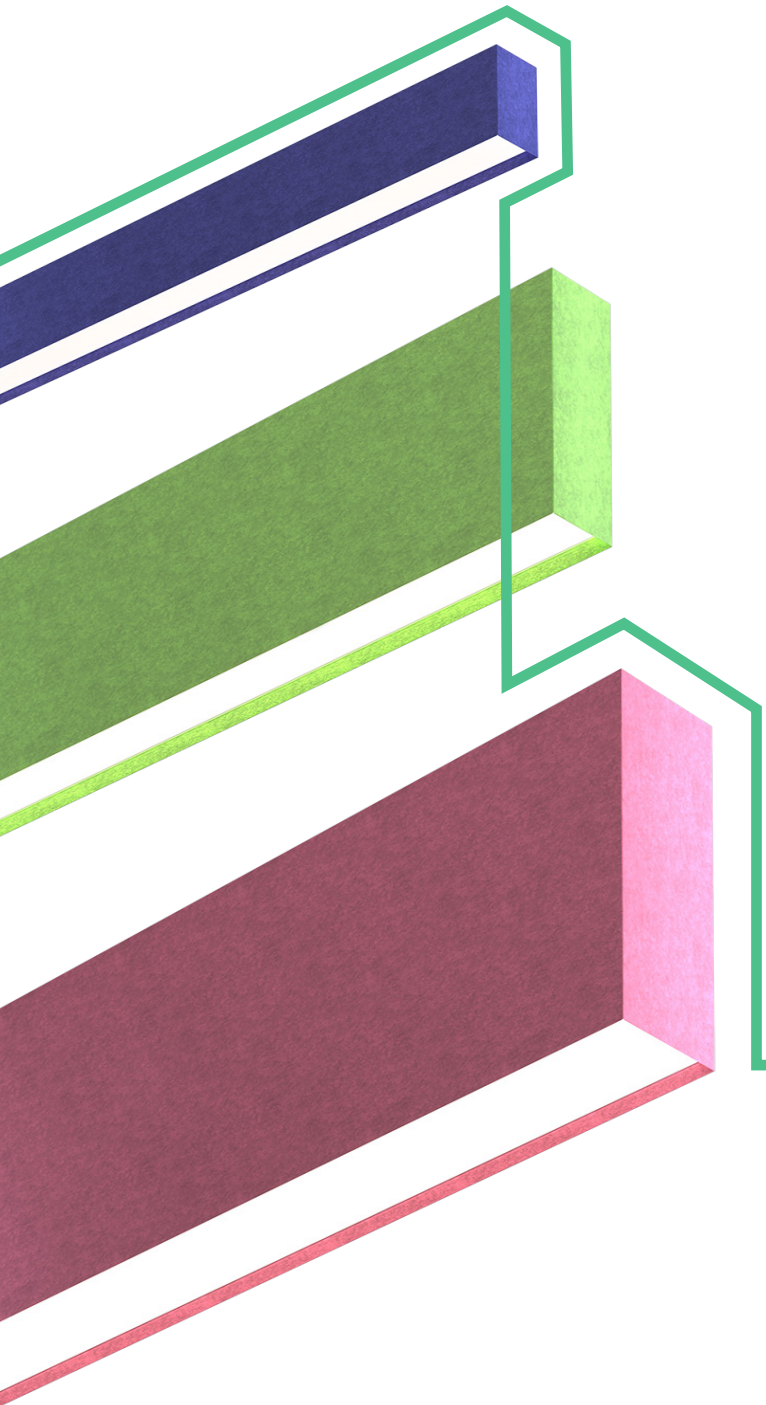

The **STFU Acoustic Series** showcases a seamless fusion of lighting and acoustics. STFU products are wrapped in high-performance acoustic felt to create quality lighting *and* noise control in one.

Our STFU acoustic felt is made from 80% recycled PET material. In addition to providing high acoustic performance, this material is lightweight and fire resistant, making STFU products the perfect addition to any commercial space.

STFU paneling can be applied to most Coronet products. It is compatible with linear and decorative lights, and can be used in custom patterns and elevations.

Enhance linear lighting by wrapping any of our LS fixtures in STFU acoustic felt.

Our LS Series offers an impressive array of linear lighting solutions, with nominal apertures ranging from 2-5". When paired with STFU paneling, this series provides a one-stop shop to fulfill all of your linear lighting and noise-reduction needs.

LS STFU products are available in 6" or custom baffle heights, so you may further tailor lighting to your specific needs. With a Noise Reduction Coefficient of .75, taller baffles increase the sound dampening effect these fixtures will have in a given space.

We also offer No-Light (NL) STFU options, which may be used to supplement acoustic performance without added illumination.
